

# Vendor Focus

## Featuring: Short Elliott Hendrickson Inc. (SEH)

**At SEH we think big.  
Then we think small.**

No matter the size of your project, our work as engineers, architects, planners and scientists begins by thinking beyond routine solutions.

It begins by **understanding your challenges.**

**Your goals. The big picture.**

We then step back and **consider all the small details.**

And **together we develop a solution** that's as unique as your project and as specific as your circumstances.

Since 1927, we've helped municipal clients **overcome challenges.** We understand our clients must meet a wide range of needs with limited resources. We help our clients respond to the needs of their communities and stakeholders with efficient and effective solutions.

SEH is a company made up of people who have a deep understanding of municipal matters. We are industry-leading architects, planners, scientists and engineers of every discipline —many who serve as City Engineers. By mixing these capabilities together, the result is useful and practical insight and resources that our municipal clients have benefitted from for the past 95 years.

## Tightening Budgets

With tightening budgets, municipalities are looking for ways to serve their constituents. As Wisconsin communities sustain and improve the local quality of life, SEH delivers responsive service and “real world” solutions for municipal projects, including:

- Road and street design
- Resurfacing and reconstruction
- Construction services
- Traffic engineering
- Intersections/roundabouts
- Traffic signals
- Street lighting
- Bicycle/pedestrian facilities
- Environmental documentation

## Knowledge We Bring to You

- State & federal funding programs
- Wisconsin policies, procedures and programs
- WisDOT requirements/regulations
- WisDOT Local Bridge Program Application process
- PS&E Documentation
- Wisconsin permitting and compliance

and towns to cities and counties to regional and statewide agencies.

Road and street projects have many moving parts that we manage, from early planning through design and construction. We keep your road and street project on schedule and on budget. Our top goal? It's to stretch client funds.

Our team includes talented professionals who perform structural design, roadway design, survey, stormwater design, right-of-way services, underground utility design and more.

Beyond these experts, SEH has readily available resources that our project team can tap into if additional support is needed.

## Bridge Design and Inspection Services

We have been a leader in bridge design, maintenance, rehabilitation, inspection and upgrades. SEH structural engineers design bridges, dams, retaining walls, box culverts, underground vaults, floodwalls and gates. SEH's highly skilled bridge inspectors have inspected more than 3,000 bridges in 48 states.

SEH delivers new or rehabilitated structures of all sizes.

## Transportation Services

At SEH, we work with communities across Wisconsin, from Bayfield to Kenosha, Appleton to Platteville. Our clients range in size from villages

## Drinking Water Engineering

From well siting studies and water quality evaluations through the design and start-up of water treatment facilities and water storage towers,

SEH engineers and scientists develop effective solutions to address all your drinking water needs.

We help you find infrastructure solutions that fit.

### Landfills and Solid Waste Services

SEH develops innovative and cost-effective solutions to the complex environmental challenges facing municipalities today. Services include solid waste and landfill planning; waste management; brownfield restoration; soil, groundwater, surface water and sediment investigations; and air and storm water permitting.

We work to protect our land and water resources.

### Architectural Services

SEH architects design municipal structures including facilities for maintenance, public safety, courts and corrections, municipal services, social services and libraries.

### Funding Acquisition Services

SEH has a team of dedicated funding specialists whose sole responsibility is to track and secure funding. In fact, SEH helped secure more than \$78 million in grants and low-interest loans in the last 24 months for our Wisconsin clients.
